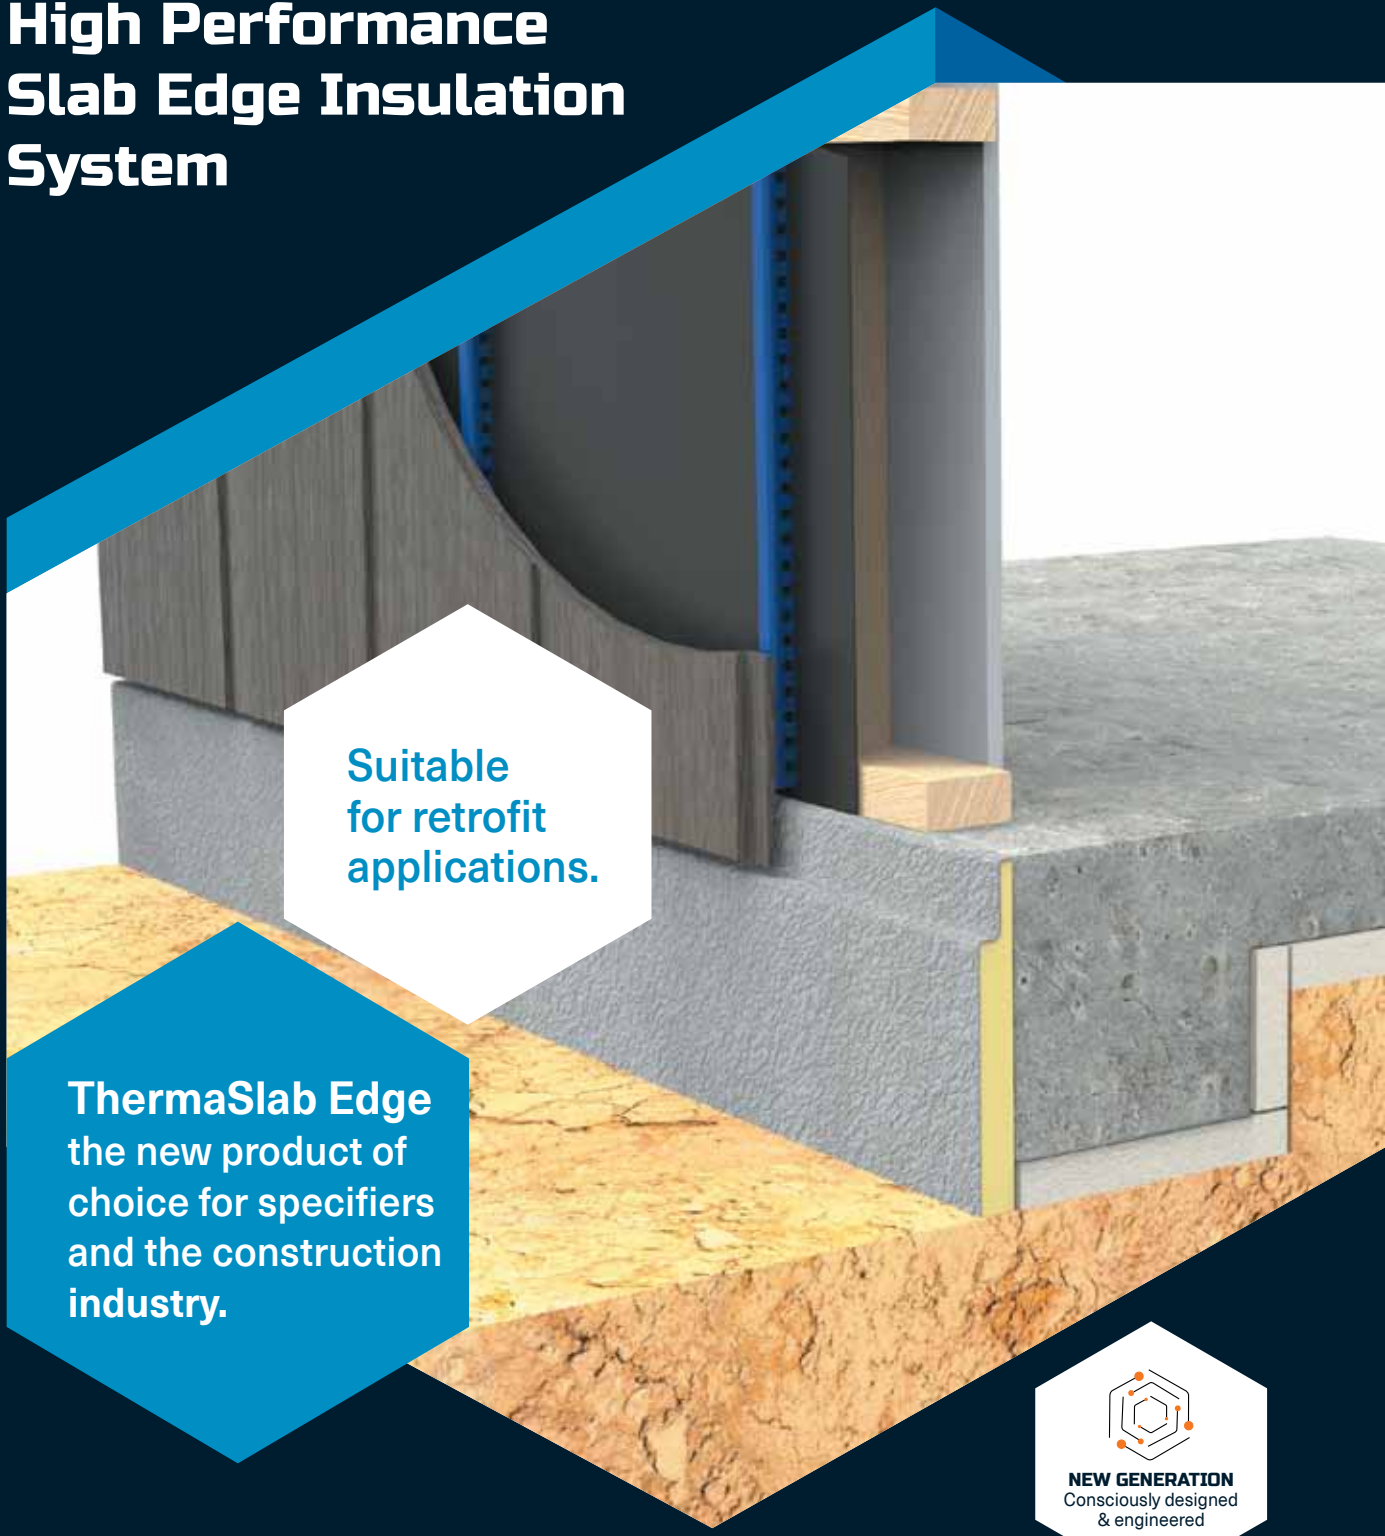
EXPOL
Guaranteed Performance

THERMASLAB EDGE

SLAB EDGE INSULATION

High Performance Slab Edge Insulation System



Suitable for retrofit applications.

ThermaSlab Edge the new product of choice for specifiers and the construction industry.

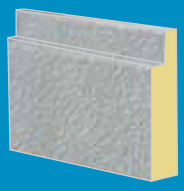
NEW GENERATION
Consciously designed & engineered

- **A cost effective slab edge insulation system**
- **No painting required, saving time & money**
- **Lengths of 2.5m**
- **Available both uncoated and coated with a water-based, water-proof resin**

EXPOL ThermaSlab Edge giving you options

PRE-COATED

With a water-proof resin, that does not require painting, saving time and money

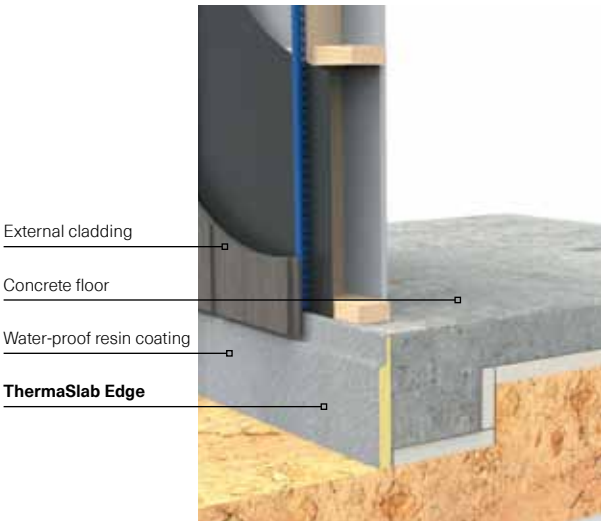


CLEAN INSULATION

EXPOL **ThermaSlab Edge** is also available as clean insulation requiring plastering

ThermaSlab Edge increases the thermal performance of a building

- A simple, cost-effective slab edge insulation system
- No painting required, saving time and money
- Exceptional insulation values
- High water resistance
- Lightweight and easy to handle



ThermaSlab Edge Technical Specifications

Property	Unit	EXPOL ThermaSlab Edge	Test Reference
Material		**Uncoated** - Extruded Polystyrene. **Coated** - Extruded Polystyrene with a water-based, waterproof resin coating.	
Density	kg/m3	30	
Product R-value		R1.0	ASTM C518-04

Sheet Size (mm)

	Length	Height	Thickness
EXPOL ThermaSlab Edge	2500	300	30
	2500	400	30

SYSTEM COMPONENTS

EXPOL Patch Kit

A 4 Litre pail of our water-based, water-proof resin coating suitable for patching joins.

STYRO–FIX CONSTRUCTION ADHESIVE

Styro–Fix is an advanced single component polyurethane-based construction adhesive. This powerful adhesive is developed especially for the construction industry and will bond most types of construction materials including timber (damp and dry), concrete, plasterboard, polystyrene and many other porous and non-porous substrates. It bonds expanded polystyrene to most surfaces, delivers strong adhesion and rapid cure, it is gun-able and non-drip.
